PROFESSIONAL SUMMARY

Java Developer with 6 months of internship experience at Meehaan Infotech, where I created a product showcase platform using Spring Boot and React.js connected to MySQL database. Designed and implemented RESTful APIs for product management operations. Successfully completed academic projects including a job aggregation platform that consolidates listings from multiple sources and an email automation tool using Gmail API. Proficient in writing clean code, conducting code reviews, and using Git for version control in team environments.

PROFESSIONAL EXPERIENCE

Java Developer Intern | Meehaan Infotech

Pune, Maharashtra | April 2024 – October 2024

- Created frontend components using React.js for a product showcase website, implementing responsive design and user interface elements with proper component lifecycle management
- Engineered backend services using Spring Boot, creating controller classes and service layer logic for product management with proper separation of concerns
- Wrote and optimized SQL queries for CRUD operations and integrated them with the application using Spring Data JPA repositories
- Designed and implemented RESTful APIs with proper HTTP methods (GET, POST, PUT, DELETE) for product data retrieval and storage, ensuring JSON response formatting
- Participated in code reviews and updated API documentation for better team collaboration
- Utilized Git version control system for code management, creating branches, commits, and pull requests following team workflow standards

ACADEMIC PROJECTS

CareerSync – Job Aggregation Platform

November 2024 – January 2025

- Architected a full-stack job aggregation platform as part of a 3-member team, handling both frontend and backend development while collaborating with an AI developer for intelligent job recommendations
- Constructed RESTful API layer using Spring Boot to aggregate job listings from multiple platforms into a centralized MySQL database
- Designed normalized database schema with proper indexing for efficient storage and retrieval of job postings
- Programmed responsive React.js frontend with component-based architecture, implementing search and filter functionality by location, role, and experience level
- Implemented scheduled background jobs using Spring Scheduler to continuously fetch and update job postings from various sources

Gmail Automation Tool – Email Campaign Backend

September 2024

- Automated email communication workflows using Spring Boot backend application integrated with Gmail REST API for bulk outreach campaigns
- Integrated Gmail REST API to programmatically send and reply to emails with proper error handling and exception management
- Implemented Apache POI library to read recipient data and email content from Excel files for dynamic content generation

- Designed automation logic to personalize email content based on recipient information from spreadsheet input
- Implemented OAuth 2.0 authentication flow for secure Gmail API access with proper token management

TECHNICAL SKILLS

Languages: Java 8, JavaScript, SQL

Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, React.js

Database: MySQL

DevOps Tools: Git, GitHub, Maven

Technologies: JPA, JSP, JUnit, HTML, CSS, REST APIs

Core Concepts: Object-Oriented Programming, Data Structures & Algorithms, Database Management, RESTful API Development

EDUCATION

Bachelor of Engineering in Computer Engineering

International Institute of Information Technology, Pune

Savitribai Phule University

Expected Graduation: June 2026 | CGPA: 7.78/10.0

ACHIEVEMENTS

- Selected among top 1,300 teams from 4.84 lakh+ participants in Flipkart Grid 6.0, a national-level technology hackathon, after successfully clearing Round 1.2
- Secured Second Place in the Education domain at Techathon 2.0, a national-level hackathon focused on building innovative educational technology solutions

LEADERSHIP & ACTIVITIES

Technical Member, IEEE Student Branch

April 2023 – May 2024

- Actively participated in coding workshops, technical seminars, and hands-on sessions covering emerging technologies and software development best practices
- Engaged in competitive programming events and collaborative learning sessions to enhance problem-solving and algorithmic thinking skills
